General statistics

1. Statistical Yearbook of Latvia 2024

The yearbook is the most exhaustive annual publication of statistics for the national economy and socio-economic processes. The publication contains ten thematic chapters: population, labour market, social protection and health, education, science and culture, economy and finance, foreign trade, business, information technologies, business sectors, as well as comparative international statistics. It reflects data on 2023, compared to previous years. Information in the yearbook is compiled in tables, charts and maps. The yearbook is based on the information available to the Central Statistical Bureau of Latvia (obtained by conducting statistical surveys) and other institutions (data in public registers and other information systems).
