

## QUALITY POLICY

**Vision:** a modern statistical institute being a national leader of innovative approach in statistical production.

**Mission:** production of reliable statistics used for socio-economic analyses and decision-making.

To implement quality policy, we base our work culture on the following common **core values:**

**Independence.** Independent and objective performance of institute functions.

**Professionalism.** Continuous increasing of the existing knowledge, introduction of new and innovative statistical production technologies and methods. Seeking and using new data sources, courage to experiment.

**Openness.** A two-way open communication with partners and data users. Investigation, finding, and following their needs, participation in and organization of national and international public debates on statistical production.

**Cooperation.** Collaboration in an efficient manner and with respectful attitude towards partners and data users. Advocacy of mutual appreciation, respect for other people's opinions, their work, and time. Being a cohesive team pursuing common goals.

Central Statistical Bureau has committed to comply with the requirements of binding laws and regulations, recommendations given by international statistical organizations as well as to work on a continuous improvement of the quality management system.

### Priorities:

- expansion of statistical production and enhancement of innovative potential;
- wider and meaningful use of modern technologies in statistical production;
- promotion of personnel growth and engagement.

Aija Žīgure  
President  
Central Statistical Bureau of Latvia
